

# Fixed Interior Design Solutions

Tomorrow's learning environments

# Full range solution provider

ST Skoleinventar is a full range solution provider with presence in all steps of the value chain. We offer and master the entire process. From the delivery of the raw materials and production to direct transport to the building sites with own installers and aftersales service.

# About ST Skoleinventar

ST Skoleinventar is a leading supplier of innovative and customized furniture solutions for learning environments at nurseries, primary schools, private schools and institutions of higher education.

## MORE THAN 20,000 CLASSROOMS

For more than 65 years, we have set the standard in designing aesthetic and fixed furniture solution for learning environments. In total we have delivered furniture for more than 20,000 classrooms in Scandinavia.

Our furniture solutions are based on design, quality and functionality as fundamental parts of the solution. We always keep focus on creating innovative and flexible solutions resulting in inspiring learning environments.

- Patented hinges (HERCULES) with a max load of 150 kg
- Brackets with opening angles of 270 degrees
- Chip board compressed to 600 kg
- All fronts are in high-pressure laminate
- Solid glued edges
- Revit Files.

## TURN-KEY SOLUTIONS

ST Skoleinventar's competency area covers product functionality, design, ergonomics, environment, energy and a long lifetime for classrooms. These competences are used in our consultancy, design, planning, project management, production and installation.

With our versatile product range, experienced and trained consultants, product specialists as well as carefully selected cooperation partners, we offer a strong and unique turnkey solution concept. Total consultancy, planning and our own production, as well as service and user training ensure a coherent and functional high-quality solution with a minimum of administration.

## DANISH QUALITY

Our solutions are manufactured and assembled at our own factory in Denmark. The factory's regional location guarantees consistent high quality for the customer as well as high reliability of delivery, repeat order guarantee and service. Production can quickly and easily be changed to accommodate new materials and varying product line dimensions.

## LARGE CAPACITY

The factory consists of 7,500 square metre factory grounds. The production facilities are updated with new machines as well as an optimised work and material flow allowing the production to be carried out as efficiently as possible. It results in high and consistent production quality and offers reliability and precision of delivery – to the benefit of our customers.

## ECO-FRIENDLY CHOICE OF MATERIALS

We consider the environment in our choice of materials and product manufacturing. As the only company in the business, we uphold to use Danish produced chipboards with a 70% share of regenerated wood. The chipboards are produced by scrap wood from the Danish woods and the timber- and furniture industry. By using chipboards made of recycled scrap wood, ST contributes to reduce the energy consumption and extend the life cycle of trees.

Interior design solutions, technology, choice of materials, and age of the facility and equipment can be critical factors in regard to energy consumption and the environment. We provide advice for our customers to make the right decisions for the best furniture solution.

“ Working with ST was a positive collaboration from concept to completion. The design development process, through drawings, workshops and mock ups, created a finished product that had a far higher degree of co-ordination and quality than we had thought was possible. Uppingham School wanted to build the best science centre they could. ST Skoleinventar’s product family, its ability to provide a great deal of flexibility within its ranges, the attention to detail and engineering quality proved to be a good match for these aspirations. ”

Colin McColl, Associate Director
