

Hercules hinge

Strongest hinge on the market with a load capacity of 150 kg

The hinge is the optimal combination of stringent strength requirements and the architect's and user's desire for an elegant design.

The solution is a slim and elegant hinge that can handle all day-to-day challenges.

- The hinge is visible from the outside with a 270 degree opening angle.
- The Danish Technological Institute has tested the load capacity of the hinge, which came out to 150 kg without any bending. The hinge can thus easily handle situations where two or three students are hanging from or sitting on the door.
- The hinge is indented into the cover and mounted on the internal side of the carcass. Bevelled edges make the hinge particularly easy to clean.

- ✓ Discreet and elegant
- ✓ Five-part hinge – for higher durability
- ✓ 270 degree opening angle
- ✓ Milled into cupboard – for higher hygiene
- ✓ Cross-fixed screws for safety and strength
- ✓ Made of extruded aluminium
