

Company Profile

ST Education

Since 1950, ST has been developing and producing furniture for educational institutions. Our successful development builds upon a high level of know-how within functional furnishing of special subject rooms.

We deliver turn-key solutions – from planning to designing, project management, delivery, installation and an excellent after care service.

2004 saw the merge as a 100 % affiliated company within the ByrumLabflex group, who operates in furnishing laboratories, hospitals and through ST Education, educational institutions. Today, the group, and indeed ST is a market leader in Scandinavia.

Dedicated staff at ST provides the highest levels of service at every stage of any project. Everyone is committed to ensuring continued development of the best solutions, current accepted practise and innovative thinking to deliver the highest quality installations.

Our solutions always meet the latest legal safety and environmental requirements. The product portfolio is constantly being developed, holding a strong focus on well-considered design, durability, ergonomics, and minimum maintenance.

To obtain the longest shelf life possible, all products go through regular quality control. We care about safety and the environment and therefore, we are certified to comply with relevant standards.

For a long time, ST Education has often been the quality description for schools, institutions, secondary education and technical colleges in Scandinavia. A distinct attention to details and understanding the end-users' exact requirements shows in every one of the more than 12,000 rooms we have fitted out during the last half century.

It makes us proud.

Our stated objectives are:

- ST Education aims to become the preferred choice for providing excellence in the design, manufacture and installation of education environments for creative and innovative learning.
- We consistently strive to provide sustainable solutions for the benefit of users, employees, and the surrounding environment.
- It is our mission to successfully develop and supply attractive learning environments for education institutions throughout Europe.

Our values

Mutual respect between clients, partners and colleagues generate the basis for a strong cooperation.

- We wish to be credible, reliable and open in our approach to projects.
- Through commitment, enthusiasm and an innovative approach to new projects, we wish to position ST Education as a natural first choice.
- We initiate long-term strategies and targets to support our company's continued growth.

Our employees

Our employees are our most valuable resource. Only through them, we will ensure a constant development of ST Education. Through a healthy working environment for the individual and as a group, we wish to provide the opportunity of reaching personal and professional goals and thus a high level of satisfaction among all employees. As with our solutions, health and safety is always key to us.

Commitment to the environment

Based on the best raw material, minimising waste and always using updated production methods, the ST Educations product range are manufactured in consideration of our fragile environment. We find that responsible.
